The fact that all of us are in the same continent, Europe and we share some high moral beliefs.

Some language particularities, the national clothes, some traditions.

We had similar words and similar dishes.

All the countries participating in the project have a special interest in culture.

I observed that our food is similar to the Turkish and to the Macedonian dishes. And. We all have the desire to get more knowledge about the other countries.

I didn't see any similarities.

The desire to learn new things.

We are all very welcoming.

Very open-minded and friendly people.

The ability to familiarize and the empathy towards the others.

Good social contacts, similar youth problems,

The main similarities were related to different customs and traditions that I have had the chance to discover. Besides these, there are daily aspects that have been debated and which seem to be quite common, such as the activities of each person's spare time as a part of a social group.

All the countries appreciate more or less the same values.

Some language aspects, some traditions.

There are many similarities between my culture and the culture of the other participating countries. We all love culture, we glorify the beauty of life, power and divinity.

There are good vibes, ambition and the desire to be involved and to grow up sharing information.

In my opinion, all cultures have their own characteristics but the Italian and the Romanian ones are similar because of the Latin influence.

All of us, as members of the same generation, even though we are from different countries, have similar habits and interests.
